

Welcome to Ostrava

Dear Colleagues,

Laryngeal surgery is an important part of our specialty. Besides classical external laryngeal approaches, we can use new endoscopic methods for diagnostic and therapeutic purposes in an increasing number of indications. Moreover endolaryngeal surgery is much more functional and have experienced an enormous progress thanks to rapid development of new technical devices designed for laryngeal surgery.

Basic knowledge as well as diagnostic and therapeutic details and panel discussion are presented by experts.

Certainly, Ostrava offers much more than a surgical course. Take the advantage to explore Ostrava's historical industrial sites by visiting interesting locations and enjoy being among colleagues.

We are looking forward to welcome you in Ostrava and to experience a scientifically and personally enriching meeting.

Prof. P. Komínek, MD, PhD, MBA

Chairman

Prof. Pavel Komínek, MD, PhD, MBA

Director of the Univ. ORL Dept. Ostrava, CZE

Organisation

Karol Zelenik, MD, Ph.D.

Deputy director for research of the Univ. ORL Dept. Ostrava, CZE
