

Program overview

October 22, Day 1

- 8.30 **Introduction**
R. Hajek, Brno
- 8.50 **Quo vadis, MG research?**
P. Sonneveld, Rotterdam
- PART I - HOT TOPICS IN MG RESEARCH***
- 9.40 **Exome Sequencing to Define a Genetic Signature of Plasma Cells in Systemic AL Amyloidosis**
E. Boyle, London
- 10.00 **First experience with whole exome sequencing in MGUS**
A. Mikulasova, Brno
- 10.20 **New models of SMM and MGUS**
R. Hajek, Ostrava
- 10.45 - 11.00 **Coffee break**
- 11.00 **Clinical impact of MRD detection in MM and mature lymphoproliferative disorders**
S. Ferrero, Torino
- 11.20 **MRD detection by digital PCR**
L. Besse, Brno
- 11.40 **Circulating microRNA in extramedullary relapse of MM**
S. Sevcikova, Brno
- 12.00 **Adding targetable complexity to an already complex disease - the myeloma epigenome**
M. Kaiser, London
- 12.30 - 13.30 **Lunch**
- PART II - WALDENSTRÖM MACROGLOBULINEMIA***
- 13.30 **Phenotypic and Genomic Comparison of Clonal B-cells in Waldenström Macroglobulinemia versus IgM MGUS**
N. Puig, Salamanca

- 14.00 **Flowcytometric analysis of Waldenström macroglobulinemia - Czech experience**
L. Rihova, Brno
- 14.30 - 15.00 **Coffee break**
- 15.00 **Circulating microRNA in Waldenström macroglobulinemia**
L. Sedlarikova, Brno
- 15.30 **Mutations in Waldenström macroglobulinemia and should they influence clinical decision making?**
W. Willenbacher, Innsbruck

October 23, Day 2

PRACTICAL PART

Polychromatic flow cytometry in monoclonal gammopathies and other plasma cell dyscrasias.
